---

### **CATEGORICAL DATA: FREQUENCY TABLES AND VISUALISATIONS**

(Nominal or ordinal scale)

Using Excel

1. Set up Frequency Table Distribution
2. Use =COUNTIF function
3. Set data range using →  $\$column\$row$  (can use F4) eg.  $\$A\$4$
4. Drag down from bottom right hand corner of cell using black +
5. Use =SUM function for total

Frequency Distribution Table	
Category 1	=COUNTIF(Range $\$A\$1:\$A\$26$ , Criteria)
Category 2	"
Category 3	"
Total	=SUM(Range of Category Frequencies above)

Suitable representation of nominal data: Pie Chart

*Charting functions in Excel required Frequency Distribution Table*

How to set up a pie chart:

1. Select Frequency Distribution Table (above) just select categories and category frequencies
2. Insert > Pie > Choose format
3. Can add percentages etc.

Using XLSTAT

1. Go to XLSTAT toolbar tab
2. Describing data drop down > Descriptive Statistics
3. General tab within descriptive statistics: Select "Qualitative Data" and deselect "Quantitative data"
